# PET-FELT PANELS STEP BY STEP INSTRUCTIONS
Before installation
Suggested tools

adhesive

roulette

level

knife

pencil

The right side

The panels have a front and back side, make sure you will glue the right side. To do this, there are designators on each panel
NORDECA NORDECA

the process

step one

Remove all unnecessary items from the wall.

step two

Assemble the panels on the floor so that you get a pattern /pattern that you will transfer to the wall
NORDECA NORDECA

step three

You can leave marks on the wall to stick the panels flat

step four

Apply glue to the back of the backside panel

If you purchased a set of backside panels only, then apply glue, glue the panel to the wall along the line and press them for 10-20 seconds
step five

Glue all the panels

Cut off the excess

step six

If you have purchased a set of front and rear panels, first glue the back panel, and then apply glue to the back of the front panel and glue it to the panel on the wall
